Bridge Training

A platform where learners can practice bridge at their own pace — a safe space to make mistakes and grow.

Bridge Training is a free interactive platform where players of all levels can practice by playing themed deals against AI opponents. No partner required, no pressure — just the learner and the cards, progressing deal by deal.

What Is Bridge Training?

Bridge Training is an educational platform dedicated to bridge, designed to make learning and teaching easier through exercises that can be played directly in the browser.

Players progress through practice at their own rhythm. Teachers get simple, effective tools to illustrate their lessons, offer targeted training, and share educational content through a simple link — no installation or technical barriers for students.

The platform is free, supported by advertising and donations, with the goal of helping bridge grow worldwide.

Themed Exercises

Deals are organised by theme, covering key topics from beginner to advanced level:

Ruffing in the short hand

How to ruff effectively?

Discarding

Which card can you throw away safely?

Suit combinations

Should you take the finesse?

Establishing a suit

How to promote your cards?

Reconstructing opponent hands

How to see through the cards?

The counter-attack

What is the killing card?

...and many more themes to explore!

For Teachers

- Create or import educational deals
- Generate a shareable link for students to play against 3 AIs
- Access a teacher workspace with shared library
- Manage and share sessions easily

For Players

- Themed deals from beginner to advanced level
- Practice against 3 AI opponents
- Comments and guidance deal by deal
- Individual progression, no pressure
